RESEARCH SUMMARY

The common theme of Ma's research lab at UConn is to understand the microstructure and rheology (flow behavior) of complex fluids, thereby developing novel, scalable techniques for processing these fluids into useful articles. Of particular interest are fundamental rheology problems with technological importance:

- Study **interfacial rheology** of particle-decorated interfaces to improve the stability of particle-stabilized foams and emulsions through varying particle size and shape (NSF- and industry-funded)
- Understand the flow dynamics of **particles in blood flow** for improved cancer therapy (NSF-funded)
- Improve the reliability and resolution of **inkjet and 3D printing** through rheology (industry-funded)

Funding and Awards: Since 2011, Ma serves as the principal investigator (PI), co-PI, and named investigator on external grants exceeding **US \$3.62 million** in total (actual PI or co-PI share: \$1.68 million). He is the recipient of **2012 Distinguished Young Rheologist Award** from TA Instruments, **NSF CAREER Award** from the U.S. National Science Foundation in 2013, **2015 Arthur B. Metzner Early Career Award** from the Society of Rheology, **3M Non-tenured Faculty Award** in 2016, and **Early Career Award** from the American Association of University Professors (AAUP) in 2017.

Publications: He has filed **2 patents**, published **2 book chapters** and **24 journal articles**, and has given over **23 invited seminars**. Ma's research has also been featured in the local newspaper and on TV News. As of August 2017, he has an **h-index of 12** and an i-10 index of 14, with 950 citations.

Education: Ma currently serves as the major advisor for **1 postdoctoral fellow**, **1 technician**, **2 PhD students**, and **1 Master student**. Previously, he **graduated 3 PhD students and 1 Master student** and hosted 3 postdoctoral fellows, 24 undergraduate students, 1 visiting PhD student, 3 visiting Master students, 3 high school teachers, and 12 high school students in his lab since Fall 2011.

Professional Services: Ma serves on the **Technical Council** of US \$171-million America's Flexible Electronics Manufacturing Innovation (NextFlex) Institute. Ma led an **NSF Industry-University Cooperative Research Center (I/UCRC)** proposal to establish a national I/UCRC on additive manufacturing with UMass Lowell and Georgia Tech. The grant is awarded and Ma will serve as the initial **Site Director**. He has also chaired and co-chaired technical sessions for **Society of Rheology** and **American Institute of Chemical Engineers (AIChE)** annual meetings. He is serving on the Editorial Board of 7 journals and as a peer-reviewer for more than 20 journals.
